MODEL HISTORY AND PRODUCTION: FERRARI 355

INTRODUCED BY FERRARI IN 1994 THE F355 WAS PRODUCED UNTIL 1999 UNTIL THE INTRODUCTION OF THE ALL NEW 360.

The F355 was an advance of its predecessor, the 348. It was gauged by its best time around Ferrari's test track, three seconds faster than the formidable 512TR. Despite its performance it was a modern car employing state of the art technology including computer controlled suspension, a light action clutch, proportional power steering and drivers air bag to make the car user friendly for every day driving. At the heart of the F355 is the phenomenal 3.5 litre, V8 engine fitted with four cam shafts and five valves per

cylinder, the layout borrowed from Ferrari's Formula 1 engine, this remarkable unit produced, a claimed, 370bhp at 8,250rpm with 268lb/ft of torque available between 5,000 and 6,500rpm. Testing an F355 in 1994, Autocar achieved a top speed of 137mph with the 0-60mph dash covered in just 4.3 seconds. 'The F355 is a landmark car for Ferrari collectors and has stood the test of time.
