

SUBARU

Confidence in Motion

SUBARU XV

e-BOXER

SUV CAPABILITY. HYBRID PERFORMANCE.

Introducing XV e-BOXER, the first generation of SUBARU's self-charging hybrid SUV range.

XV e-BOXER combines an electric motor and a 2.0L e-BOXER petrol engine. Additional power from a compact, lightweight Lithium-ion battery enhances driving responsiveness, refinement and terrain-gripping torque. There's no need to plug in to recharge: the petrol engine charges the battery whilst you drive. Power assistance from the electric motor – Motor Assist – is completely automatic. It works seamlessly with the e-BOXER engine to give you a smoother, more efficient and rewarding drive.

Built on the SUBARU Global Platform, XV enjoys SUBARU's latest advanced driver assistance systems and passenger safety technologies, including EyeSight driver assistance. SUBARU's permanent Symmetrical All-Wheel Drive with X-MODE ensures go-anywhere capability. Expect surefooted handling and all-weather grip. Rugged reliability is in SUBARU's DNA. You'll experience it in XV mile after mile.

The XV e-BOXER self-charging hybrid. SUV capability. Hybrid performance.

CITY STYLE THAT'S COUNTRY CAPABLE.

The SUBARU XV is always up for a challenge – so it's engineered to give you confidence at the wheel. Its high driving position ensures excellent visibility, whilst permanent Symmetrical All-Wheel Drive and a high ground clearance fearlessly conquer rough roads. Extra assistance from the electric motor, alongside X-MODE, makes negotiating steep inclines and descents effortless. Choose your destination for the weekend: XV will get you there safely and comfortably.

X-MODE ENGAGED
X-MODE gives you reliable control at the push of a button, taking command of the engine, transmission, Symmetrical AWD, brakes, and other components to help you navigate through challenging conditions and varying terrain. When X-MODE is activated, Hill Descent Control automatically maintains a constant speed when travelling downhill: all you have to do is steer.

LOAD UP. SET OFF.

EXPLORE AND ENJOY.

For outdoor sports and hobbies, or weekends away, a vehicle must be spacious and versatile. XV offers ample storage capacity so you can bring all your kit and baggage along. Wherever your plans take you, XV is ready.

SMART STORAGE SOLUTIONS

XV offers ample, flexible storage. The wide, large boot opening makes loading and unloading easy, whilst 60/40 split rear folding seats quickly create even more flexible space. For larger items, there are easy-to-use roof rails*.

*Requires purchase of optional accessory attachments to carry items on the longitudinal roof rails.

DETAILS MAKE THE DIFFERENCE.

Open the doors of the XV and you can't fail to notice the refined, sporty styling. The cabin is welcoming, spacious and well-equipped. Contoured seats provide you and your passengers with luxurious support to keep everyone comfortable, even on the longest rides.

01. POWER-SLIDING, TILT ADJUSTABLE SUNROOF*

In fine weather, it's easy to connect with the great outdoors. The sunroof quickly opens to allow daylight to flood into the cabin in seconds.

02. ORANGE SEAT STITCHING

The ultra-comfortable contoured seats, upholstered in cloth or leather*, feature distinctive orange stitching – yet another detail that adds to XV's finesse.

03. REAR SEAT CENTRE ARMREST

The interior of the XV offers comfort for all passengers, with cup holders in the rear seat centre armrest.

*Available on Premium models only.

STAY IN TOUCH. FEEL CONNECTED.

XV is equipped with a next-generation infotainment system that keeps you connected wherever you go. The 8" multi-function colour touchscreen provides intuitive access to navigation¹, connected devices and audio sources, whilst the multi-information display provides key vehicle stats. These displays all improve convenience, safety, and enjoyment. In touch and in control – that's how you'll always feel inside XV.

01

02

03

04

01. APPLE CARPLAY™ AND ANDROID AUTO™*2

Apple CarPlay™ and Android Auto™ mirror compatible apps from your smartphone onto XV's touchscreen, allowing you to make phone calls and dictate text messages hands-free, reducing distractions when you're on the road³.

02. MULTI-INFORMATION DISPLAY

The 4.3-inch LCD multi-information display at the top of the instrument panel provides you with useful information, including the use of petrol engine, electric motor or combination hybrid power, in an easy-to-understand view. When the navigation system¹ is in use, it connects to the multi-information display and shows turn-by-turn information.

03. INSTRUMENT PANEL

The full-colour LCD meter display helps you understand useful driving information at a glance so you can keep your eyes on the road.

04. REVERSING CAMERA

When you engage reverse gear, the reversing camera displays a live colour image along with guidelines to assist in parking manoeuvres.

¹ Available on Premium models only.
² Driver is responsible for safe driving. Please refrain from operating the touchscreen while driving.
³ This functionality uses your smartphone's data.

SUBARU CORE TECHNOLOGY.

SUBARU's core technologies define what makes a SUBARU a SUBARU – and the unique driving experience that only our vehicles can provide. These core systems enable SUBARU vehicles to live up to the brand's exceptional standards of performance, comfort, safety, and reliability. They also underpin SUBARU's promise to deliver both driving enjoyment and peace of mind.

01 BOXER ENGINE

The horizontally-opposed configuration of the SUBARU Boxer engine places pistons 180 degrees apart for a lower, flatter profile than other engine types. One of the main benefits of this configuration is that the pistons' movements naturally counteract each other, helping to reduce vibration and noise and delivering a smoother driving experience. The engine's shape and unique piston movement allow it to be installed lower down and further back than a conventional engine, giving the whole car a low centre of gravity and balanced weight distribution for exceptional handling and poise.

03 LINEARTRONIC + ACTIVE TORQUE SPLIT AWD

SUBARU Lineartronic is a Continuously Variable Transmission that moves between a span of gear ratios to provide smooth acceleration while keeping the engine at its optimal rev range. Lineartronic works particularly well with Symmetrical AWD as it preserves momentum that is often lost during gear changes on a manual or traditional automatic transmission. When the clutch pedal is depressed on a manual or the lock up clutch is released on a normal automatic, you break power to the wheels causing them to slow and lose performance.

02 SYMMETRICAL ALL-WHEEL DRIVE

SUBARU's permanent Symmetrical AWD maximises handling and enhances control on all roads in almost any conditions. Unlike any other all-wheel drive configuration, the engine, transmission and propshaft are positioned in a symmetrical straight-line layout which provides a direct route for traction and delivers a maximum transfer of power to all four wheels at all times. The driveshafts are similar lengths, reducing torque steer and eliminating the need for additional controls or weights to be added as the symmetrical design is inherently stable, producing natural balance and performance for a safer ride.

In contrast, Lineartronic helps to maintain traction by continuously providing power to the wheels at all times. Lineartronic is paired with Active Torque Split AWD which controls torque distribution between the front and back wheels. Normal torque split is set to 60% at the front and 40% to the rear. However, sensors constantly monitor changes in grip, vehicle speed and stability of the car and will in real time adjust the torque to each wheel, maintaining optimum grip, if more demanding conditions are identified.

A PERFECTLY-BALANCED CONFIGURATION

The design, shape and position of the Boxer engine results in the car having a very balanced weight distribution. This contributes to the car's excellent handling and offers increased stability compared to V or transverse engine types.

The Boxer engine, with its unique configuration, sits low in the chassis and is located further back allowing engine weight to be more evenly distributed over all four wheels.

In contrast, V and transverse engine positioning is restricted by the bulkhead. They have to sit further forward, compromising the vehicle's balance and stability.

In addition, V-type engine weight is positioned above the wheel line making it top heavy. Transverse engine weight is positioned above the wheel line and is also heavier on one side. Boxer engine weight is positioned centrally in line with the wheels, making a rigid structure that is resistant to side to side motion and body roll when cornering.

04 SUBARU GLOBAL PLATFORM

SUBARU Global Platform underpins the next generation of SUBARU vehicles. Enhancing all-around safety and performance, it offers a driving experience you can only find in a SUBARU. It's the future of SUBARU – and delivers even more enjoyment and peace of mind to all drivers and passengers.

1. IMPROVED SAFETY PERFORMANCE

Body strength is increased by 40%. In the event of a collision, the frame can absorb and safely dissipate more energy. The new frame design also improves energy dispersal, directing more energy safely beneath the seating compartment.

2. BETTER STABILITY AND HANDLING

By increasing rigidity of the body, front suspension and rear subframe, XV has enhanced straight-line stability and minimal body roll. More responsive handling allows the driver to better steer the car as intended and improves hazard avoidance.

3. ENHANCED RIDE QUALITY

Vibrations and noise are minimised to improve passenger comfort. Suspension improvements and a highly rigid chassis provide a quiet, comfortable journey for all.

Motor Assist Driving

High-load driving:
Engine Driving

Deceleration:
Regeneration

SUBARU BOXER ENGINE + ELECTRIC TECHNOLOGY

For efficient driving, the SUBARU e-BOXER system adjusts the power-split ratio between the 2.0-litre direct-injection engine and the electric motor to match the driving conditions. When paired with Lineartronic, the result is quiet, smooth, powerful performance – and a rewarding drive.

MORE RESPONSIVE ACCELERATION. GREATER TORQUE.

When pulling away, or in slow traffic, the electric motor alone does all the heavy lifting. Whilst at cruising speed, the e-BOXER petrol engine drives the car – but also recharges the battery. When accelerating or under load, both the engine and the motor provide power together. Assistance from the electric motor is completely automatic, working seamlessly with the e-BOXER engine.

ENHANCED HANDLING. REASSURING STABILITY.

The placement of the motor, engine and battery along the vehicle's centreline, low to the ground, complements the vehicle's already excellent stability. The low centre of gravity and balanced vehicle weight distribution further enhances SUBARU's Symmetrical AWD design.

ALL-WHEEL DRIVE. GO-ANYWHERE CAPABILITY.

XV makes the most of SUBARU's superior All-Wheel Drive capabilities. When negotiating challenging tracks or slopes, the electric Motor Assist enhances torque response. You can climb inclines smoothly without stepping hard on the accelerator.

01 SUBARU REAR VEHICLE DETECTION**

SUBARU Rear Vehicle Detection (SRVD) includes Blind Spot Monitoring, Lane Change Assist & Rear Cross Traffic Alert. Sensors placed at the rear of the vehicle alert you to vehicles in your blind spots for safer lane changes and can also warn you of potential collision danger when reversing out of a parking space.

02 HIGH BEAM ASSIST**

High Beam Assist (HBA) increases visibility and safety when driving at night by automatically toggling the high beams on and off when oncoming traffic is detected.

03 VISIBILITY

XV has been designed with the viewing angle of the driver in mind to offer excellent front and rear visibility.

04 VEHICLE DYNAMICS CONTROL SYSTEM

The Vehicle Dynamics Control System monitors and analyses if the vehicle is following the driver's intended course via an array of sensors. If the vehicle begins to veer from its intended path, the All-Wheel Drive torque distribution, engine output, and brakes at each wheel are adjusted to assist in keeping the vehicle on course.

SUBARU GLOBAL PLATFORM (SGP)

The SGP's enhancements throughout the chassis – higher rigidity, increased strength, better rolling resistance and responsive steering – particularly benefit these safety systems.

05 HAZARD AVOIDANCE

The lower centre of gravity design, enhanced suspension system, and rigidity improvements provide a vehicle that responds immediately when evasive actions are taken, helping you to avoid hazards on the road.

06 CABIN-PROTECTING LAYOUT

In the event of a collision, the low-mounted engine and gearbox are designed to both absorb the impact and drop safely below the passenger compartment, protecting occupants' legs. To allow for this movement, the cradle securing the engine is engineered to collapse, allowing the engine to slide downwards.

07 RING-SHAPED REINFORCEMENT FRAME

The Ring-shaped Reinforcement Frame makes use of high tensile steel panels and has been structurally designed for efficient energy absorption from impacts in all directions.

08 SRS AIRBAGS**

Front SRS airbags, front side SRS airbags, curtain SRS airbags, and a knee SRS airbag are standard on XV to give all passengers a higher level of protection in the event of a collision.

09 WHIPLASH-REDUCING FRONT SEATS

Designed to enhance comfort and help the driver feel more planted for greater control, these seats can also help reduce the possibility of whiplash resulting from certain types of collisions.

10 LOCKING-TONGUE SEATBELTS

During an impact, the locking tongue limits movement in the seatbelt and reduces impact in the lower chest area to improve safety and reduce injury levels.

*1 The driver is always responsible for safe and attentive driving and observance of traffic regulations. Please do not depend solely on SUBARU Rear Vehicle Detection or High Beam Assist for safe driving. There are limitations to the recognition features of these systems. See Owner's Manual for complete details on system operation and limitations.

** SRS: Supplemental Restraint System. Must be used with seatbelts.

ACTIVE SAFETY

PASSIVE SAFETY

SUBARU EYESIGHT DRIVER ASSIST TECHNOLOGY.

At SUBARU, we believe in all-around safety. An important part of that is pre-collision safety: making every effort to ensure an accident never happens. That's why we created EyeSight*, SUBARU's cutting-edge driving support system. Like a second pair of eyes for the road ahead, EyeSight uses two stereo cameras capturing three-dimensional colour images with excellent image recognition, nearly as capable as the human eye. More accurate than traditional

camera and sensor technologies, EyeSight uses images from both cameras to precisely determine shape, speed and distance, meaning it not only detects vehicles but also motorbikes, bicycles and pedestrians. When a potential hazard is identified, it warns the driver and even applies the brakes if necessary, to help avoid an accident. With excellent safety performance, EyeSight gives the driver ultimate peace of mind.

DRIVER ASSIST

01. ADAPTIVE CRUISE CONTROL

Adaptive Cruise Control allows the driver to set vehicle speed and distance to the car in front. It constantly monitors distance and speed then adjusts the engine, transmission and brakes accordingly to maintain speed in line with the traffic flow. Designed for use on motorways and similar roads, Adaptive Cruise Control improves driver comfort and convenience on long drives.

02. LANE SWAY AND DEPARTURE WARNING

Lane Sway and Departure Warning will alert the driver with a visual and audible warning if the vehicle sways or departs its lane without indicating.

03. LEAD VEHICLE START ALERT

It's easy to become distracted when waiting in stationary traffic. EyeSight will prompt the driver to notice that vehicles in front have started moving again with a buzzer and a flashing indicator.

04. LANE KEEP ASSIST

Lane Keep Assist will offer gentle steering control if the vehicle is about to deviate from its lane at approximately 40 mph or above.

ACCIDENT PREVENTION

05. PRE-COLLISION BRAKING SYSTEM

Pre-collision Braking System activates visual and audible warnings to alert the driver of a potential collision. If the driver fails to take evasive action, the brakes will be applied automatically to either prevent an accident entirely or reduce the severity of an impact depending on speed. If the driver brakes but does not apply enough pressure, the system will increase braking force.

06. PRE-COLLISION THROTTLE MANAGEMENT

If the car is parked facing an obstacle, EyeSight will give the driver a visual and audible warning if they accidentally select drive instead of reverse. The system will also cut engine output to help avoid a frontal collision.

*EyeSight is a driving support system which may not operate optimally under all driving conditions or for all objects. The driver is always responsible for safe and attentive driving and observance of traffic regulations. See Owner's Manual for complete details on system operation and limitations for EyeSight including functions in this brochure.

Field of vision range from EyeSight (not an actual measurement).

01. LED STEERING RESPONSIVE HEADLIGHTS

Powered by LEDs, these bi-functional headlights combine low and high beams and are steering-responsive, ensuring good visibility around corners at night.

02. 18-INCH ALUMINIUM-ALLOY WHEELS

You'll immediately tell the XV apart from any other vehicle by its distinctive wheel design. These durable and lightweight wheels showcase XV's powerful, lively, and unique personality.

03. LED FRONT FOG LAMPS

These LED fog lamps have inner reflective surfaces that offer enhanced visibility and improved safety during night time driving.

04. KEYLESS ENTRY AND PUSH-BUTTON START SYSTEM

With the key fob in your possession, you can unlock the front doors or boot by just gripping the handle and start the engine with a push of a button.

*Available on Premium models only.

05

06

05. ROOF RAILS*

Roof rails on the XV make light work of carrying bulky loads.

06. ELECTRONIC PARKING BRAKE (EPB)

One touch effortlessly engages the electronic parking brake. On acceleration, the brake automatically releases.

07. DUAL-ZONE AUTOMATIC AIR-CONDITIONING SYSTEM

The air-conditioning system distributes air efficiently for a comfortable cabin in any weather. Both driver and front passenger can independently set their preferred temperature.

08. DUAL USB PORTS AND AUXILIARY AUDIO INPUT JACK

Keep all your electronic devices fully charged with easily-accessed USB power ports for both front and rear passengers. Connect just about any music player through the aux-in jack to play your favourite songs through the audio system.

*Requires purchase of optional accessory attachments to carry items on the longitudinal roof rails.

*1 MPG figures are EU test figures for comparative purposes and may not reflect real driving results. There is a new WLTP test used for fuel consumption and CO₂ figures. However, the CO₂ emissions shown are based on the outgoing NEDC test and will be used to calculate vehicle tax on first registration. Only compare fuel consumption and CO₂ figures with other cars tested to the same technical standard. The fuel consumption you achieve in real life conditions and CO₂ produced will depend upon a number of factors including accessories fitted (post-registration), variations in weather, driving styles and vehicle load etc. Fuel consumption and CO₂ emissions: According to EC 715/2007-2018/1832.

*2 Measured by VDA (V211, V212 & V214).

†The service intervals for SUBARU XV e-BOXER are every 12 months/12,000 miles, whichever comes sooner. The SUBARU XV e-BOXER is covered by 5 Year/100,000 miles [whichever is sooner] Limited Warranty. This comprises of a standard 3 Year/60,000 miles [whichever is sooner] Manufacturer's Warranty [bumper to bumper] and an Extended Warranty that applies to the powertrain only, provided by SUBARU (UK) Limited, to complete the 5 Year/100,000 miles [whichever is sooner] Limited Warranty. ^In addition to the above, the Lithium-ion Traction Battery is covered by 8 Year/100,000 miles [whichever is sooner] Warranty. Bodywork is covered by a 12 year Anti-Corrosion Warranty and paintwork is covered by a 3 Year/60,000 miles [whichever is sooner] Warranty. Added reassurance is provided by a comprehensive 3 Year Recovery and Assistance package valid in the UK and Europe. For general terms and conditions visit subaru.co.uk.
