EV Flash Report

LS7I WND

EXECUTED BY	Manamanx
TEST COMPLETED AT	28.08.2026, 09:35
MAKE/ MODEL	Volvo XC90
MODEL VARIANT	T8 Recharge
YEAR OF MANUFACTURE	2021
VEHICLE TYPE	PHEV
ODOMETER READING (MILES)	40,771
VIN (LAST 4 DIGITS)	8571
ORIGINAL BATTERY KWH (TOTAL)	11.6
ORIGINAL BATTERY KWH (USABLE)	10.0

Charging Figures (10–80% Charge)

TYPE	TYPICAL LOCATION		TIME TO CHARGE	AVERAGE COST
Slow	Home (3.7kW)	☾	2 h 4 min	£1
		☼	2 h 4 min	£2
Fast	Supermarket		2 h 4 min	£4

- Data reflects the **average** time and cost to charge the vehicle from 10% to 80% at the time of print.
- Charging above 80% should be reserved for longer trips to preserve battery condition.
- Energy night tariffs can provide substantial savings when charging at home overnight.
- This vehicle's maximum charging rate is 3 kW.

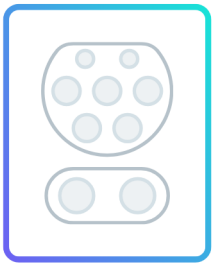

REPORT ID

28.08.2026

All data shown on this report is for informational purposes only.

POWERED BY ClearWatt

Charging Compatibility

AC Charging
TYPE 2

Public UK AC chargers
90,172 SLOW/FAST

DC Charging
CCS

Public UK DC chargers
24,150 FASTEST

DC charging relates to rapid charging at locations such as motorway services and petrol stations. To view all public chargers in the UK, head to zapmap.com.

Charging Port Location

Front Left Side

This vehicle is equipped with a charging port located at the **front left side**.

Further Vehicle Data

Air Quality
CAZ ULEZ

This vehicle will need to pay to enter Ultra Low Emission Zones (ULEZ) and Clean Air Zones (CAZ).

London Congestion Charge
£18/DAY

This vehicle is not exempt from the London Congestion Charge and pays the standard £18 daily charge.

Vehicle Classification
ULEV

This vehicle is a plug-in hybrid vehicle (PHEV). It is classed as an Ultra Low Emission Vehicle (ULEV).

Road Tax / Vehicle Excise Duty (VED)
£200/YR

This vehicle will incur road tax of £200 annually.

Original Vehicle Warranty
WARRANTY EXPIRED

The original **vehicle** warranty is 3 years or 60,000 miles.
This warranty has now expired due to the age of the vehicle.

1 ClearWatt Battery Scorecard

An electric car's battery is complex, and a single percentage rarely tells the whole story - two cars showing the same number can be in quite different health. That's why we don't rely on one figure. The ClearWatt Battery Scorecard weighs up a range of evidence - from readings taken directly from your vehicle, such as cell voltages and charging history, to wider checks like software version and recall status - to build one clear, consistent assessment of battery condition.

2 Battery Warranty vs Vehicle Warranty

- EVs typically come with two separate warranties, one for the vehicle and one for the battery inside the vehicle.
- Vehicle warranties typically cover any faults with the motor, drivetrain, electronics and control systems of the car.
- The battery warranty provides protection against accelerated battery degradation and battery faults. The battery warranty covers the performance of the battery, ensuring the performance does not drop below the manufacturer's stated threshold. Speak to your EV retailer to find out more information about the current status of the battery warranty on this vehicle.
- This report provides the status of the vehicle in the context of the original stated manufacturer's battery and vehicle warranty. Additional criteria or information may be requested or required from the manufacturer in order to validate a claim.
